ZEN PARK

A theme park in the form of Zen gardens is being planned.

The park is to be constructed in the Japanese style, including the principles of Buddhism.

The Zen Park will offer a tour of the park, a café, various courses and a unique glamping experience.

The park will be designed in the Buddhist style and will consist of all four components of the soil, namely, wood, water, iron and metal.

The park will be decorated with shrubs, bonsai, interestingly designed low-growing conifers, unique trees, bamboo, wooden and metal sculptures and statues, wooden benches, swings and various stone accessories.

The park will also include a café offering alcohol-free and healthy drinks, snacks, and a place for various courses and meditation.

There will be 5 glamping houses in the park, offering accommodation with breakfast, serving local food. The park will also have toilets.

The entire park will be open all year round. Visitors will be able to enjoy all park's benefits (tour, café, accommodation and courses) from April to October. From October to April, visitors will only be able to enjoy the park's café, except in December, when the park will be filled with Christmas decorations and there will be plenty of activities for children.

The ZEN Park will offer its visitors an unforgettable experience.
